EDUCATION

California State University, Sacramento *Aug 2021 - May 2026*

Bachelor of Science in Computer Science and Statistics

Relevant Courses: *Database Management Systems, Software Engineering, Intelligent Systems and Machine Learning, Analyzing and Processing Big Data, Parallel Programming with GPUs, Data Visualization, Data Mining for Business Analytics, Statistical Computing*

TECHNICAL SKILLS

Programming: Python, R, C
Data: Tableau, SQL
Tools: Git, Jira
Software Development: Agile/Scrum, Debugging, Testing, Technical Documentation

INDUSTRY PROJECT EXPERIENCE

Thermochron Systems LLC — Mass Spectrometer Baseline Noise Analysis *Feb 2026 – May 2026*

- Modeled 492,000+ instrument measurements across 6 dwell-time settings and 3 independent lab locations.
- Built cleaned long-format datasets from raw instrument files using Python.
- Quantified dwell-time effects using summary statistics, log-scale diagnostics, and visual analysis.
- Evaluated noise distribution fit using KDE, Q-Q plots, and log-scale statistical modeling.
- Delivered client-facing findings and conclusions to support baseline correction strategy.

CSUS Dept of Biological Sciences — SciComm Empathy Survey Analysis *Feb 2026 – May 2026*

- Analyzed whether scientific communication training improved empathy scores in a pre/post survey study.
- Analyzed matched pre/post survey data from 222 participants using R.
- Tested intervention effects using Welch's and paired t-tests, mixed ANOVA, and ANCOVA.
- Interpreted pre/post improvement results and identified no significant Intervention vs. Control effect.
- Communicated statistical methods, assumptions, limitations, and findings using client-facing written reports.

WCP Solutions — Client Relationship Management Platform *Aug 2024 – May 2025*

- Developed an internal web application for WCP Solutions' sales teams to manage client relationships and streamline daily workflows.
- Built searchable client tables, geographic mapping, route directions, contact integration, and customer note-tracking functionality.
- Collaborated on an eight-person development team using Agile practices, biweekly sprints, Git, and Jira.
- Tested and refined application functionality based on stakeholder requirements and user workflows by maintaining regular meetings with company stakeholders and faculty advisors.

PROFESSIONAL EXPERIENCE

International Consulting Associates (INCA) — Data Analysis Consultant *June 2026 - Current*

- Developed Excel reporting tools with automated calculations, adjustable assumptions, and annual cost projections to quantify labor costs from meal-period violations, missed punches, and location-based timekeeping exceptions.
- Created reusable analysis templates and documented methodologies to streamline future reviews and support cost-control recommendations.
- Transformed payroll and timekeeping records into executive reports highlighting labor-cost exposure and compliance trends.

Flawless Boxing and Fitness — Youth Afterschool Program Coordinator *Oct 2024 - Current*

- Manage program procedures, safety requirements, and day-to-day operational issues.
- Lead structured programming focused on skill-building, discipline, and confidence while maintaining organization, accountability, and effective communication with multiple sites across 3 districts.
